Professional Objective

AI/ML professional with an MCA specialization in Artificial Intelligence and Machine Learning, experienced in Python-based application development and AI/ML workflows. Seeking opportunities to build reliable AI solutions, develop machine learning models, and contribute to model deployment and software engineering.

Professional Experience

Associate Analyst – Machine Learning R&D *Sep 2026 – Present*
GlobalLogic

- Contribute to Machine Learning R&D activities involving data-oriented workflows and technical problem-solving.
- Support assigned team activities and follow established processes for research and development tasks.
- Collaborate with team members to support assigned technical tasks and maintain clear documentation of work.

Software Developer Intern *May 2026 – Sep 2026*
Rancho Labs

- Worked on web application features, application logic, debugging, and functional testing.
- Contributed to application development and maintenance, including an instructor attendance management system.

Project Intern – Software Development *Jan 2026 – May 2026*
Xebia

- Developed Python backend components and REST API functionality using FastAPI for an AI-powered decision-support application.
- Worked with MongoDB Atlas, API integration, data handling, debugging, and application testing.
- Supported troubleshooting and validation of application workflows to improve functional reliability.

Technical Skills

Programming: Python, SQL, Java, Bash Fundamentals
AI and Machine Learning: Scikit-learn, Model Training, Feature Engineering, Model Evaluation
Deep Learning and AI: PyTorch, TensorFlow, NLP, Generative AI
Backend and APIs: FastAPI, REST APIs, JSON, API Integration
Data and Databases: Pandas, NumPy, MySQL, MongoDB Atlas
Tools and Deployment: Git, GitHub, Linux Fundamentals, Docker and MLOps Fundamentals

Projects

AI-Powered Product Decision and Trade-off Intelligence System GitHub Repo
Python, FastAPI, React, Claude API, MongoDB Atlas
Developed an AI-assisted application to evaluate product options and organize decision factors. Integrated LLM APIs and backend services to support structured decision-making workflows.

Diabetes Prediction System GitHub Repo
Python, Machine Learning
Developed a machine learning project for diabetes prediction using patient-related input features. Explored data preparation, classification, and prediction workflows.

Deep Learning Experiments GitHub Repo
Python, Deep Learning
Explored neural network implementations and deep learning concepts through Python-based experiments. Practised model building and understanding training workflows.

House Price Prediction GitHub Repo
Python, Machine Learning
Built a machine learning project focused on predicting house prices from property-related features. Worked with data preparation and regression-based prediction workflows.

Education

Master of Computer Applications (MCA) *2024 – 2026*
University of Petroleum and Energy Studies (UPES), Dehradun
Specialization: Artificial Intelligence and Machine Learning **78%**
Bachelor of Computer Applications (BCA) *2020 – 2024*
Veer Kunwar Singh University **72%**

Certifications

AI 201: GL Certified AI Professional – Data Science Certificate Link
AI 301: GL Certified AI Expert – Enterprise AI Architecture Certificate Link
Software Testing – Learning Path Certificate Link
